### Pure and Applied Mathematics Journal

*Pure and Applied Mathematics Journal* is a mathematical journal for publishing early, high-impact results in the areas of mathematics and computer science/informatics. The journal also emphasizes mathematical articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, engineering and all applied sciences. For a paper to be considered for publication it is a precondition that it is not submitted for publication elsewhere and contains results that are new, significant and of interest to wide sections of the mathematical community. Editors may invite papers on special topics of current interest. All papers, whether contributed or invited, will be refereed.

#### Abstracting and Indexing

#### Published Special Issue

**Integral Geometry Methods on Derived Categories in the Geometrical Langlands Program**

Volume 3, Issue 6-2  
Submission Due Date: Nov. 30, 2014

Lead Guest Editor: **Francisco Bulnes**, Department of Reserch in Mathematics and Engineering, TESCHA.
